NH NATURAL HERITAGE BUREAU DATA

This map illustrates the general locations of rare plants, wildlife, and natural communities (natural communities are different types of wetlands, forests, etc.). Precise locations are not shown due to the data's sensitive nature. The NH Natural Heritage Bureau's database contains more detailed information including locations, population sizes, and habitat descriptions.

Please contact the Natural Heritage Bureau at (603) 271-2214 for more information. Wildlife occurrences are compiled and displayed in cooperation with the NH Fish & Game Department's Neigame Program, who may be reached at (603) 271-2462.

RARE PLANTS, WILDLIFE, AND/OR NATURAL COMMUNITY:

Contact the Natural Heritage Bureau for additional information.

Occurrence within circle, but precise location not known due to unclear record. Contact the Natural Heritage Bureau for additional information.

Natural Community Occurrence

This map displays the NH Natural Heritage Bureau data coverage maintained by UNH GRANIT. This data is carefully distributed to ensure the confidentiality guidelines of the NH Native Plant Protection Act (NH RSA 217-A:4) and to respect landowner privacy issues. It should be noted that occurrence has been shifted a random distance and direction of its actual location. The purpose of the shift is to protect rare species from unscrupulous collectors and to protect landowner privacy by making it harder to infer whether an occurrence is on a specific parcel of land.

Locations of "C" Precision have been withheld from this map due to their imprecise location. Most of these cases are old and vague and likely would not be helpful to the planning process.

The final map may not be used as a substitute to NH Natural Heritage Bureau reviews that are required by the Department of Environmental Services, Federal Energy Regulatory Commission, or any other local, state, or federal governmental agency.

Environmental Services, Federal Energy Regulatory Commission, or any other local, state, or federal governmental agency.

The Natural Heritage Bureau of New Hampshire is the best available information for locations and statuses of rare species and natural communities in New Hampshire, but there are certainly occurrences that have not yet been found.

RPC Standard Legend

Road Type	Water Features
State	Waterbody
Local	Swamp/Marsh
Not Maintained	Stream / River
Private	Other flow line

Town of Kensington (7667.8 Acres)

Base Features (transportation, political and hydrographic) were automated from the USGS Digital Line Graph data, 1:24,000, as archived in the GRANIT database at Complex Systems Research Center, Institute for the Study of Earth, Oceans and Space, University of New Hampshire, Durham, NH; 1992-2012. The roads within the Rockingham Planning Region have been updated by NH Department of Transportation through local input by the RPC where available.

Although these data have been processed successfully on a computer system at the Rockingham Planning Commission, no warranty expressed or implied is made regarding the accuracy or utility of the data on any other system or for purposes not intended by the data provider. The data are provided "as is" without any warranty, expressed or implied, and the user assumes all liability for any use of the data. The data are provided for informational purposes only and should not be used for any other purpose. The data are provided for informational purposes only and should not be used for any other purpose.
