

# Water Resonces

## Kensington, NH

Date: 8/7/2013

**Water Features**

- Waterbody
- Swamp/Marsh
- Stream / River
- Other flow line

**Road Type**

- State
- Local
- Not Maintained
- Private

**RPC Standard Legend**

- Waterbody
- Swamp/Marsh
- Stream / River
- Other flow line

**Dam Hazard Class**

- Hazard Class AA
- Ruins
- Public Supply Wells (active)

**Rockingham County Soil Survey**

- Wellhead Protection Area
- Watersheds (HUC 12)
- Great Brook-Exeter River
- Powwow River
- Taylor River-Hampton River
- Welland Soils
- Very Poorly Drained Soils
- Poorly Drained Soils

**Drinking Water Source Protection Areas**

Drinking Water Source Protection Areas have been delineated by the NH Department of Environmental Services as part of the State's drinking water protection program under the Clean Water Protection Act, RSA 485-C. The coverage is limited to sources of community water supply, non-transient public water supply, and rock water supply. This map shows watershed delineations for groundwater sources and watershed delineations for surface water intakes and groundwater sources under the direct influence of surface water. These areas are used by the Department of Environmental Services in setting priorities for protection activities.

**Soil Based Wetlands**

Soil Based Wetlands shown on this map are derived from soils classified as "very poorly drained" and "poorly drained" by the USDA Natural Resource Conservation Service. Soil boundaries are from NRCS Rockingham County Soil Survey, published at 1:20,000 scale. Soil unit boundaries that coincide with water body boundaries in the field will not always coincide on this map, due to their differing data sources and scales. Information shown on this map is for planning purposes only. Data automation completed by Complex Systems Research Center, UNH, October 1999. Soils delineation based on field work, conducted by the USDA Natural Resource Conservation Service, completed in 1985.

**Base Features**

Base Features (transportation, political and hydrographic) were automated from the USGS Digital Line Graph data, 1:24,000, as archived in the GRANIT database at Complex Systems Research Center, Institute for the Study of Earth, Oceans and Space, University of New Hampshire, Durham, NH; 1992-2012. The roads within the Rockingham Planning Region have been updated by NH Department of Transportation through local input by the RPC where available.

Although these data have been processed successfully on a computer system at the Rockingham Planning Commission, no warranty expressed or implied is made regarding the accuracy or utility of the data on any other system or for general or scientific purposes, nor shall the act of distribution constitute any such warranty. It is also strongly recommended that careful attention be paid to the contents of the metadata file associated with these data to evaluate data set limitations, re-trictions or intended use. Rockingham Planning Commission shall not be held liable for improper or incorrect use of the data described and/or contained herein.
