City _____ State _____ Zip Code _____

Telephone _____

Number Of People At This Address Requesting Potassium Iodide: _____

By completing and submitting this application to receive potassium iodide tablets from the State of New Hampshire, I understand the following:

- ▼ The use of potassium iodide is voluntary. I am not required to accept it or use it.
- ▼ Potassium iodide is NOT a substitute for evacuation. Evacuation is the most effective protective action in the event of a radiological emergency.
- ▼ Potassium iodide protects only the thyroid gland from only radioactive iodines. In a radiological release, I would still be vulnerable to possible exposure to other forms of radiation.
- ▼ Children under 14-years of age are most at risk from the effects of radioactive iodines on the thyroid gland.
- ▼ Although KI is generally safe, it can cause health risks in persons with existing thyroid conditions and those allergic to iodine or shellfish. Anyone considering using potassium iodide should consult with his/her health care provider.
- ▼ I assume full liability for using potassium iodide and for replacing the tablets when they expire.
