

## FIRE HYDRANT/CISTERN APPLICATION FORM

Permit fee: New: \$75.00, for repairs: \$50.00 payable to the "Town of Kensington, NH".

If you are installing either a dry fire hydrant or a fire cistern, Kensington Fire Rescue requires certain information **prior** to installation.

Plans and installation shall conform to NFPA 1, NFPA 1141 and 1142 editions as adopted by the State of NH Fire Code, SAF-C-6000 and SAF 300, local ordinances and Kensington zoning, site plan and Planning Board rules and regulations.

### INFORMATION NEEDED:

This application shall be filled out completely and returned to the Fire Prevention Division.

Submit two (2) sets of COMPLETE plans. "Complete" means that plans and application shall be accompanied with a letter from the designer/Engineer that plans meet all requirements as required by state code and local ordinances. The plans submitted shall include calculations, piping diagrams and specification sheets for all tanks, piping and all other devices associated with the installation.

**Approved plans must be on file with the Kensington Fire Rescue and a permit issued BEFORE installation work begins. This is NOT a permit.**

Plans that have been reviewed by the Prevention Division will have a copy of the approved plans returned to the installer. The Division shall be notified and review any deviations from the approved plan before final testing.

The Division may require a copy of above ground and underground-piping certificate prior to inspection, depending on the system being installed. Inspections may include a 24-hour leak test, vacuum test and witnessed flow test using KFR apparatus. A timeline for installation and testing shall be provided to the Fire Prevention Bureau prior to final testing. Tanks shall be full prior to flow testing. Winter installations may have a delay in testing until safe to do so, upon approval of the Fire Chief.

**All inspection requests require 3-day minimum notice by installer. A Fire Official shall witness any tests as required by NFPA documents.**

The below signatures are stating that the contractor agrees to the minimum requirements for this installation.
