10 Kuegal Storage Yard	Heavy Machinery

◆ Dam / Bridges

Critical facilities have been provided by the Town of Kensington, Fall 2002. Dams are used from the NH Department of Environmental Services, and have been partially modified by the Rockingham Planning Commission. Bridges are from the NH Department of Transportation database, and have been modified prior to 2002.

Base data (town boundaries, hydrography, roads, railroads and utility lines) are taken from the USGS Digital Line Graph data, 1:24,000, as archived in the GRANIT database at Complex Systems Research Center, Institute for the study of Earth, Oceans and Space, University of New Hampshire, Durham, NH; 1992-1999. Roads have been updated from work done by Rockingham Planning Commission and NH Department of Transportation. Partial updates have been completed through 2000.
